

NHI Course 132012

**Soils and Foundations
Workshop**

Participant Workbook

April 2002

**NHI COURSE 132012
SOILS AND FOUNDATIONS WORKSHOP
PARTICIPANT WORKBOOK**

TABLE OF CONTENTS

	<u>Page</u>
1.0 Introduction	1
2.0 Course Organization	1
3.0 Course Agenda	3
4.0 Course Presentation	
Lesson 1	
Topic 1 – Introduction to Soils and Foundations Workshop	1-1-1
Topic 2 – General Overview of Geotechnical Input to Highway Projects	1-2-1
Lesson 2	
Topic 1 – Site Investigation and Sampling Methods	2-1-1
Topic 2 – Layout of Subsurface Investigation for a Bridge Foundation	2-2-1
Lesson 3	
Basic Soil Properties for Foundation Design	3-1
Lesson 4	
Laboratory Testing for Foundation Design	4-1
Lesson 5	
Topic 1 – Slope Stability	5-1-1
Topic 2 – Solutions to Slope Instability	5-2-1
Lesson 6	
Topic 1 – Embankment Settlement	6-1-1
Topic 2 – Treatment for Embankment Settlement Problems	6-2-1
Lesson 7	
Topic 1 – Spread Footing Design–Bearing Capacity	7-1-1
Topic 2 – Spread Footing Design–Settlement	7-2-1
Lesson 8	
Topic 1 – Deep Foundation Design–Load Capacity	8-1-1
Topic 2 – Deep Foundation Design–Pile Groups	8-2-1
Lesson 9	
Topic 1 – Construction Control Considerations–Instrumentation	9-1-1

**NHI COURSE 132012
SOILS AND FOUNDATIONS WORKSHOP
PARTICIPANT WORKBOOK**

Topic 2 – Construction Control Considerations-Foundations	9-2-1
Topic 3 – Construction Control Considerations-Pile Load Testing	9-3-1
Lesson 10	
The Foundation Investigation Report	10-1
Lesson 11	
Course Summary, Review, and Critique	11-1
5.0 Solutions to Student Exercises	12-1
